

# FROMM FSW-10 Semi Automatic Pallet Wrapping Machine

The FROMM FSW-10 Semi Automatic Pallet Wrapping Machine was designed to be a simple, reliable machine for wrapping 1 - 20 pallets per day. FROMM have stripped away all unnecessary functions & confusing programs from the FSW-10. By focusing on one thing (wrapping) we are able to offer Australia the most cost effective, entry level wrapping machine on the market.

## Features

- Automatic one-touch operation
- Adjustable spring brake with quick release
- Automatic pallet height detection sensor
- Soft start and stop for light loads
- Top and bottom wraps selector

## Benefits

- Requires no previous experience to operate
- Alternative to hand wrapping
- Ideal for wrapping 1-20 pallets per day
- Plug & play
- FROMM 2 year warranty

## Machine Stretch Film

Premium film can reduce the cost to wrap a pallet whilst maintaining the all important containment forces needed to maintain the security of your goods whilst stored and transported.

Ask your JT Dixon representative for their guidance.

## Technical Specifications

### Capacity:

Max. Pallets per Day: 20

### Pallet Size:

Width (mm): 1050  
 Length (mm): 1050  
 Max. Height (mm): 2200  
 Max. Weight (kg): 1200

### Film Tension:

Adjustable  
 Max. Pre-stretch (%): 75

### Film Specification:

Width (mm): 500

### Turntable:

Speed (RPM): 10  
 Diameter, round (mm): 1500  
 Height (mm): 76

### Power Supply:

240V, Single Phase, 50 Hz

### Power Consumption:

Power consumption approx. (kW): 1

### Weight:

Total weight approx. (kg): 335

### Operating Conditions:

Temperature range (°C): 0 - +45
