

# FROMM P329S Battery Powered Plastic Strapping Tool

The new FROMM P329S Battery Powered Strapping Tool is the latest edition to the FROMM range of strapping tools. It features an easy to use colour touch screen, with symbols for streamline operation. Its unique 3 in 1 feature offers manual, semi-automatic or automatic operation all in one easy to use tool.

The ergonomic one-handed operation allows you to easily lock the right tension force, speed and sealing time at the touch of a finger. Consistently strap a great variety of products, in series or individual and variable packages.

## Features

- All in one easy to operate colour touch screen
- Slanted touch screen to mitigate water & dust
- 3 in 1 tool, manual, semi-automatic or automatic
- Maintenance system will tell you when service is advised
- Pre-stored strap types & 10 free configurable strap modes
- Brushless motor technology

## Benefits

- No more mechanical buttons and knobs
- Simple optimisation of the strapping
- Integrated app for strap database management & updates
- Fast rechargeable battery
- Robust with little maintenance required
- Fromm 2 year warranty

## Polyester (PET) Strap

For optimal strapping efficiency we recommend our range of PET strap.

Ask your JT Dixon representative for their guidance.
